

A chapel was built in Beringen in 1715. The patron saint was St. Andrew the Apostle. Due to a lack of space, a new chapel (now the old chapel) was built in 1754 at the corner of Rue d'Ettelbruck-Rue Wenzel. This chapel

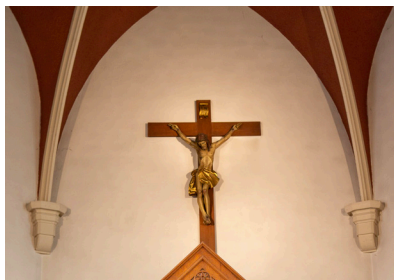

was desecralised at the beginning of the 20th century and has served as a clubhouse for a billiard club since the 1990s.

At the beginning of the 20th century, again for lack of space, it was decided to build a new chapel, mainly with donations from the villagers. 1909 was the solemn blessing of the foundation stone of the present building. The plans were drawn up by the architect Pierre Funck. The shell was already completed in 1910. The chapel building consists of a vestibule, a single-nave nave, a choir area and a sacristy. The cross-ribbed vaulting determines the neo-Gothic interior. In the choir there is a net vault. The floor is covered with tiles from the construction period (1910), which are monochrome or polychrome and have floral or geometric patterns.

The interior decoration dates back to the renovation works of 1978. This is mainly evident in the carpentry work, but also in the floral metalwork of the door and the brass candlesticks.

Cross

Above the altar is a figure of Christ on the cross with the inscription „INRI“. This abbreviation stands for „Iesus Nazarenus Rex Judaeorum; Jesus of Nazareth, King of the Jews“.

Sacred Heart

There is a statue of the Sacred Heart on the high altar.

Saint-Joseph

In the right-side altar, we recognise St. Joseph with baby Jesus and lily.

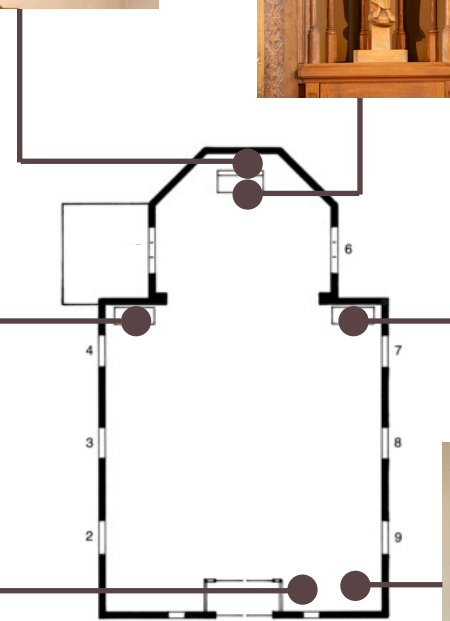

Madonna

In the left side altar there is a crescent moon Madonna, a consolatrix with the Child Jesus and the key.

station of the cross

To the right of the entrance door we can see a station of the cross which comes from the „old chapel“.

Saint-Andrew

Next to the entrance is a statue of St. Andrew with the X-shaped St. Andrew's cross. His help is invoked for marriage wishes and for the wish of a child's blessing.
